 **M-Bus**

RI-F100-B-MB / RI-F100-G-MB

MID**UK CA****CE****X 4****MID****Installation must comply with MID certified requirements****MID Config Lock**

>> see 'Configuration' for Lockable Settings

All terminal covers provided must be fitted. All cable connections and terminal covers of the meter and the CT must be secured with sealing hasp.

Once Configuration Mode is entered, 'MID Config Lock' will activate after 15 minutes or if meter is switched off. No further adjustment is possible for the lockable settings. Unlock only by returning to supplier.

Specifications		Accuracy						
Wiring Input	3Ø 4 wire (MID Approved) 3Ø 3 wire, 2Ø 3 wire, 1Ø 2 wire	Voltage V L-N and V L-L			±0.5% of full scale			
Rated Input Voltage	3x 11...300V AC (L-N), 19...519V AC (L-L)	Current			±0.5% of full scale			
Frequency Range	47...63Hz (MID approved @ 50Hz)	Frequency for L-N > 20V, L-L > 35V			±0.1% of full scale			
CT Primary	1A/5A...6,000A configurable	Active, Reactive and Apparent Power			1%			
CT Secondary	1A or 5A (MID approved for 5A only) max rating x1.2	Power Factor			±0.01 of Unity			
VT Primary	100...600V configurable	Active Energy			EN50470-3: Cl.B			
VT Secondary	173...415V AC (L-L) configurable	Reactive Energy			EN62053-23: Cl.2			
Auxiliary / Power consumption	100...240V AC (±15%), 47...65Hz / < 8VA	Apparent Energy			Class 1			
Display Update Rate	1 sec all parameters							
Operating / Storage Temperature	-10...55°C / -20...70°C							
Humidity	0...85% non-condensing	Wh Resolution and Default Pulse Weight						
Protection Degree (IEC/EN60529)	IP54 Front only (rubber gasket fitted)	CT Ratio x VT Ratio	<15	<150	<1500	<15000		
Pulse Output	External 5...27V DC / 100mA max	Wh / VArh / VAh /	0.01k	0.1k	1k	0.01M		
Pulse Resolution / Duration	0.01...99.99kWh per imp / 50...300ms					0.1M		
Communication	Modbus RTU over RS485 MBus (EN13757)	Example						
		If CT = 100/5A (CT ratio = 20) & VT = 350/350V (VT Ratio = 1) Wh resolution = 0.1kWh (20 x 1 = <150) Pulse O/P default = 0.1kWh/pulse						

**PRODUCT SAFETY**

Safety related notification, symbols and instructions that appear in this operating manual or on the equipment must be strictly followed to ensure the safety of personnel as well as the instrument. If the equipment is not used in a manner specified by the manufacturer it may impair the protection provided by the equipment

- Do not use the equipment if there are mechanical damage
- Do not exceed the stated maximum ratings of the device
- No repairs, maintenance or adjustments are possible
- Read the complete instruction manual prior to installation or operating the unit
- The equipment in its installed state must not come into close proximity to any heating sources, oils, steam, caustic vapours or other unwanted process by-products
- Do not use in hazardous or classified location where explosion or other dangers can be triggered by the device

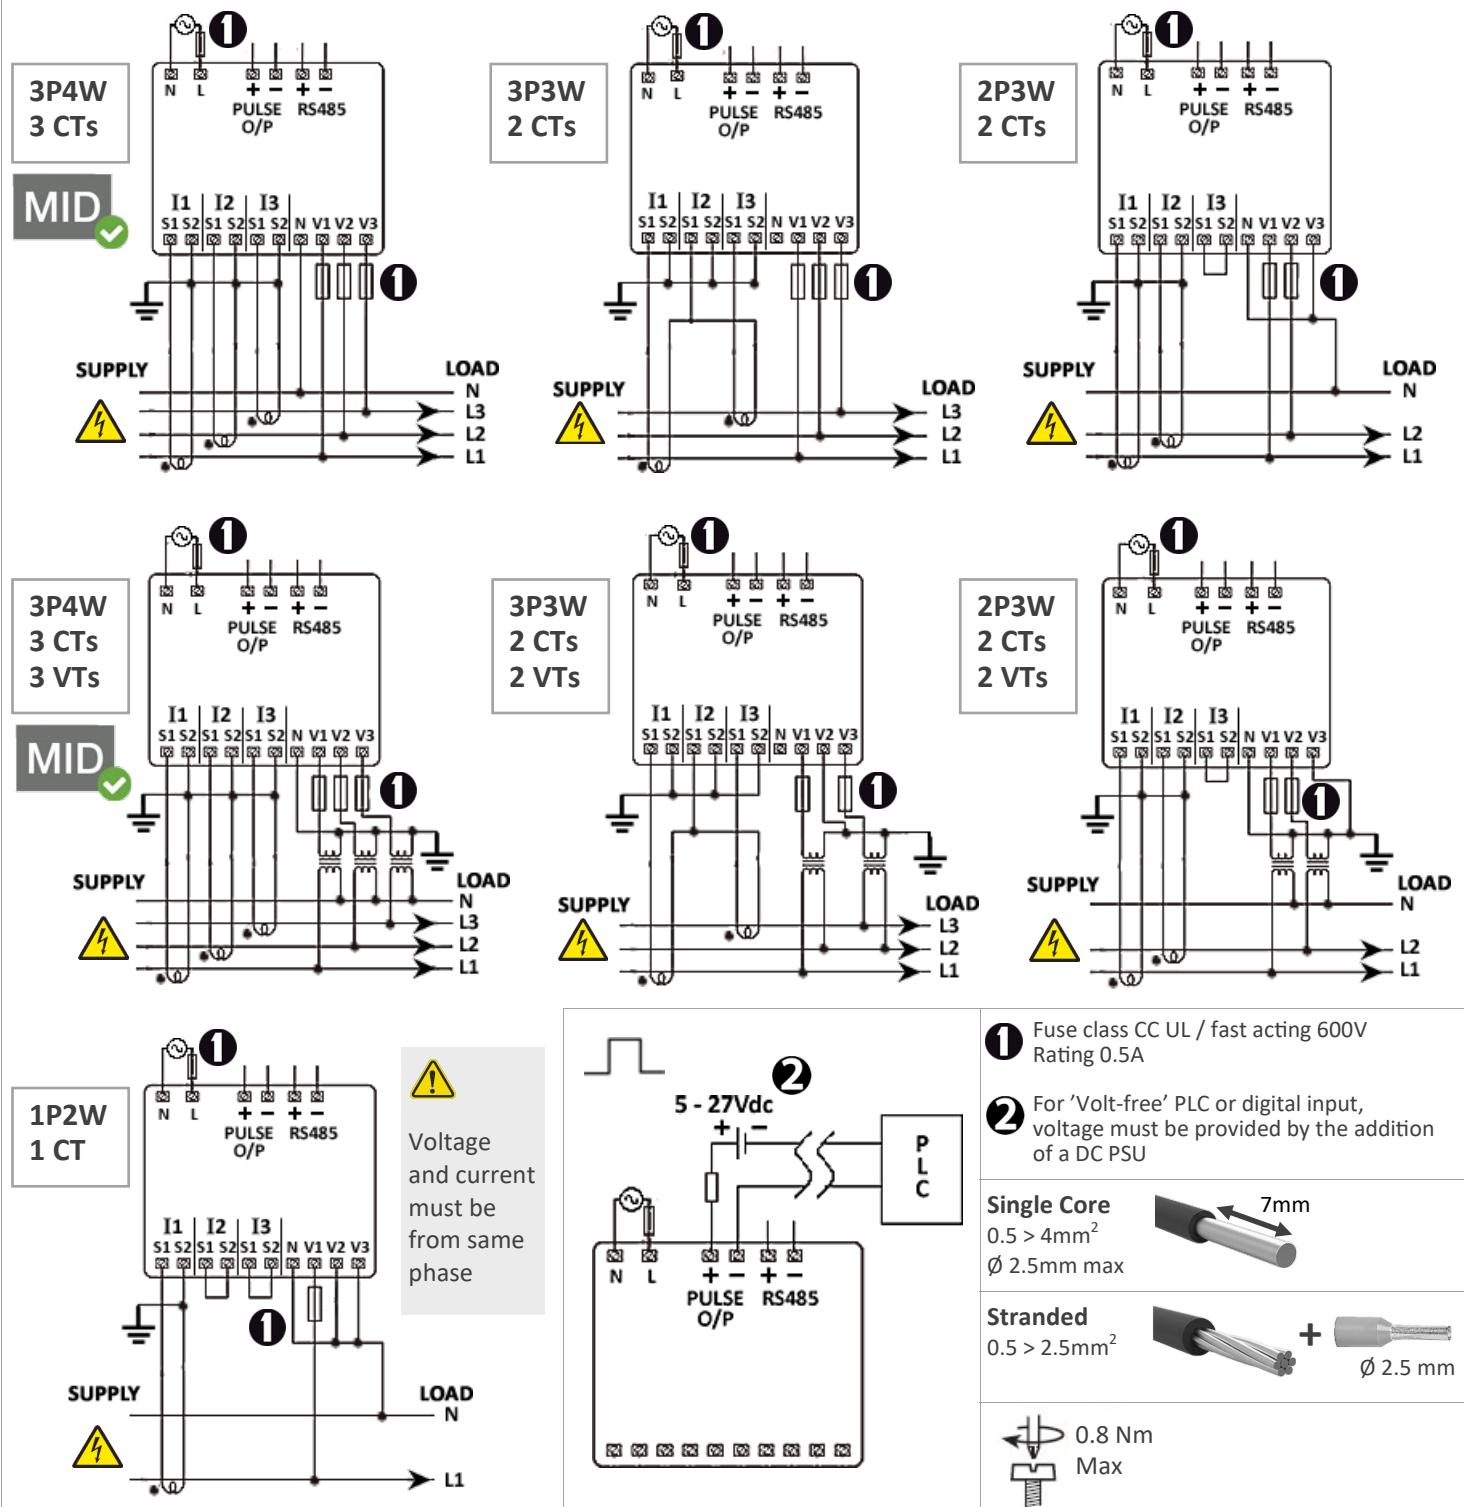

Risk of electric shock!

Only to be installed by a competent person

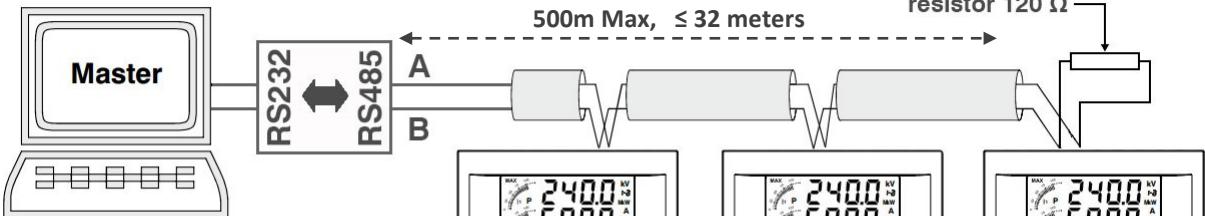

- To prevent the risk of electrocution, always isolate and lock-off the power supply to the equipment prior to undertaking any work
- Always confirm absence of electricity prior to starting work using appropriate voltage detection equipment
- Wiring shall be done strictly according to the terminal layout
- Confirm that all connections are correct before energizing the equipment
- Routing of cables shall be way from any internal EMI source
- Copper cable should be used
- All wiring to be in accordance with applicable local standards

WIRING

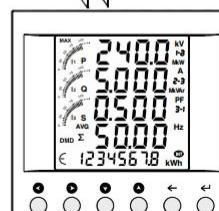

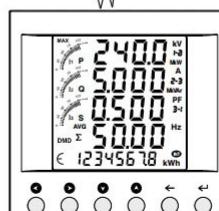

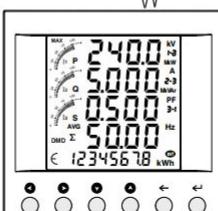

Modbus / MBus

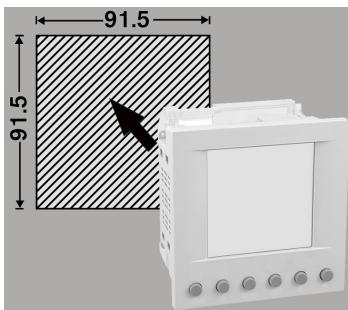

Typical Modbus configuration shown
For MBus interface follow Wiring Topology below

Wiring Topology	A B	Daisy Chain	Star Network
Modbus	+ -	✓	✗
MBus	1 2	✓	✓

MECHANICAL INSTALLATION

Panel mounted, installed indoor only.

The meter is intended to be installed in Mechanical Environment 'M1', with Shock and Vibrations of low significance, as per 2014/32/EC Directive.

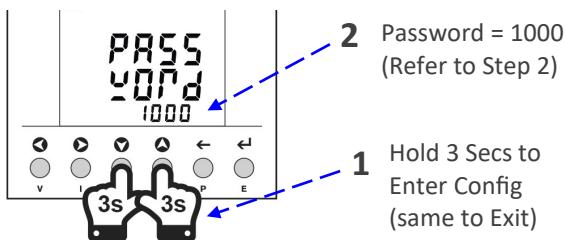

The meter is intended to be installed in Electromagnetic Environment 'E2', as per 2014/32/EC Directive.

Installation Category III (300V L-N)

Protection Class: II Pollution degree: II

CONFIGURATION

Step A: Enter Configuration Menu

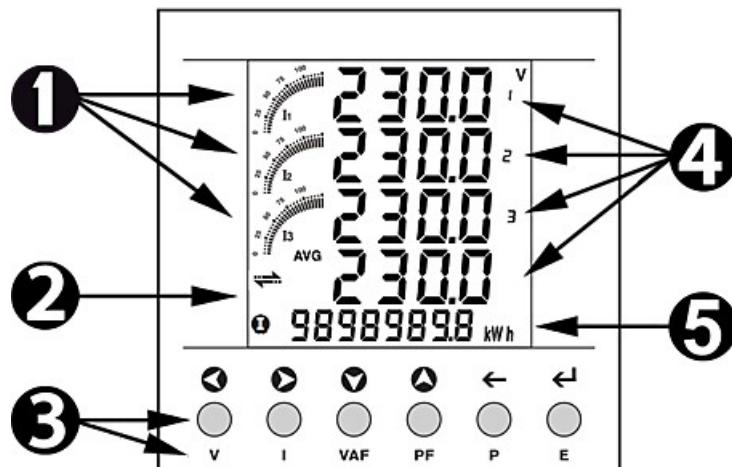

Step B: Configure each setting, as required, referring to Settings Table below, using the buttons as follow:

1			Press either button once to make digit or option flash, press again to move flashing cursor
2			Press to change digit or option, press or to move cursor position as required
3			Press to save and move to next setting option, Exit menu once all settings are configured (see Step 1)

F100-X-C F100-X-MB	Setting	Default	Adjustment Range	Network & CT Must configure	VT Adjust if Using VT	Comms Modbus / MBus	Pulse O/P Adjust if utilised	System Settings Optional
1 1	Change Password	1000	NO / YES (0000 - 9998)					✓
2 2	Phase Network Selection	3P4W	3P4W (also for 2P3W) 3P3W, 1P2W-P1, 1P2W-P2, 1P2W-P3					
3 3	CT Secondary (see CT Label)	5	1A or 5A					
4 4	CT Primary (see CT Label)	5	1A/5A > 6000A
